PEACE OF MIND FOR MOTHERS WITH HAPPY BABIES!

Every baby is a blessing; they add excitement, joy and beauty to a house that otherwise would seem pretty much empty. The excitement spread by the newcomer is the beginning of a new story for parents.

Witnessing the first steps of their little one can be one of their fondest and most special memories they will ever experience.

And, we are doing our best to be a part of those happy memories. We are taking on board your insights and opinions to make sure you see your little ones grow up safe, healthy and happy and producing all our baby furniture products according to safety, health and functionality principles.

Because we are here not only to ensure that your babies feel safe, comfortable and happy in their rooms but also for you, the mothers, to be able to access easily the materials you need for taking care of your baby and share the happiness of your baby with a peace of mind.

Newjoy Design brings your dream house up to your finger tips!

Newjoy breaks the ground in the furniture world with its yet another new app that makes life easier:

Newjoy Design

As you try to pick your Baby, Youth or Home furniture, Newjoy Design will help you figure out how your new furniture will fit into the layout of your house. In addition, this new app will allow you to take photos of your own room and design it in a much more comfortable way. This will mean that you will enjoy its capabilities through your decision making.

With this app, you will be able to apply Newjoy Home and Newjoy Baby-Young products together while you can also see their color and fabric alternatives in a practical way and you can create the right combination for your home. Newjoy Design will open the doors to you for a new possibility where you will be able to see realistic sizes of these premium products and get price information.

You can download our "Newjoy Designer" app.

It is good to know!

GIVING YOUR BABY A SAFE SLEEPING ENVIRONMENT.

- Lay down your baby on his/her back on a hard baby crib without leaving any gap.
- Remove any pillows, blankets, fleece, soft toys, and other soft products from inside the baby crib.
- If you are going to use a blanket, place the baby in a way that will make its legs touch the end of the crib. Push a thin blanket underneath the bed from both sides and cover the baby only up to its chest.
- Bebeğinizin kafasının uyku anında örtülü olmadığını kontrol edin.
- Make sure your baby's head is not under the blanket during sleep.
- Do not let your baby sleep on a water bed, soft mattress, pillow or on any other soft surfaces.
- Make sure your baby crib conforms to current safety standards

ATTENTION POINTS WITH BABY CRIBS

Cribs, feeding chairs and other accessories used from the moment a baby is born must be selected with safety concept in mind as a substantial element. Parents and caregivers must be well informed about the potential risks in the environment. These risks may arise from misuse of the product or from the fact that the product is not designed to meet their particular use.

FEATURES OF A SAFE BABY CRIB

- The gaps between the guardrails should be maximum 60 mm wide so your baby cannot push her/his body in between.
 - A hard bed must be used in a size to leave no space between the bed and the crib walls so your baby does not get stuck in between the bed and the crib walls.
 - The corner poles should not be higher than 6.3 mm from both ends of the crib in order to prevent the clothes of the baby from getting stuck in-between.
 - There should not be any holes, where the baby could place her/his head on both ends of the crib.
 - The base should be easily removable from the crib frame.
 - There should not be any splintery or rough surfaces on the baby crib.
 - There should not be any missing, loose, broken, or misplaced screws, connection parts, or crib or bed board parts.
- 

LAURA

Happiness is more than what is visible; sometimes,
you should feel it instead.

newjoy®

Everything is for them
to have healthy,
happy and peaceful
happiness.

Babies are also in safe hands...

When designing our products, we use as smooth and transient lines as possible instead of sharp and hard lines for the safety of babies and also make sure that guardrails are designed to provide a high level of safety.

Health first

Believing in the necessity of healthy and safe designs, we introduce the new generation to our robust fashion designs manufactured with healthy and suitable raw materials. As Newjoy, we certainly do not use harmful substances that may adversely affect the health of our babies.

Happiness with Design!

We are committed to making our products modern, functional and comfortable. By doing so we help the babies feel happy in their rooms. With our new designs we want to do our share to make babies much more happy in their worlds.

High quality and safety

Before presenting our products to your pleasure, we check that these products comply with the high safety and quality standards in line with the basic principles of our production understanding, and we take care that this process is sustainable. That is why we can offer you a 7 year long warranty.

BABY KIDS YOUNG

MATTRESS

Pediatric orthopedists and pediatric development professionals maintain that babies need sleeping surfaces that protect their backbone for a healthy and balanced growth.

Why?

Besides allowing for a balanced support of baby's developing bones, choosing the right type of bed also supports the balanced development of their backbone structure. A more balanced development of the backbone structure will result in healthier and stronger bones.

Well exactly at this point...

Designed with expertise recommendations in mind, Newjoy Bed with its orthopedic bed springs that houses special sponges shall support in full the body of your baby.

The ergonomic and hygienic materials used in the Newjoy Bed support the baby's backbone structure and help their healthy development.

- 1 Knitted fabric
- 2 90 gr/m² anti-bacterial fibers
- 3 10 mm Highly resistant sponge layer
- 4 Highly resistant spun-bonded lining
- 5 Shock absorbing thermo felt layer
- 6 2.20 mm wire radius Bonnell spring system
- 7 Shock absorbing thermo felt layer
- 8 Highly resistant spun-bonded lining
- 9 10 mm Highly resistant sponge layer
- 10 90 gr/m² anti-bacterial fibers
